

Primele melodii!

-Romana

Este usor sa canti la xilofon!
Piesele colorate de mai jos
reprezinta notele muzicale si
culoarea lor iti indica nota
muzicala respectiva. Cand
intalnesti o piesa mai mare,
lasa tonul sa rasune inainte
de a reda urmatoarea nota
muzicala. O reprezentare
dubla a notei respective
inseamna ca trebuie sa sustii
tonul un timp de doua ori mai
lung.

Sa inceapa distractia!

English

Playing the metallophone is
easy!
The colored blocks represent
the bars of the instrument
and their color shows you
which one to play. When you
come across a wider block,
you let the tone resonate
before playing the next tone.
A double wide block means a
sustain that is double as long.
Have fun!

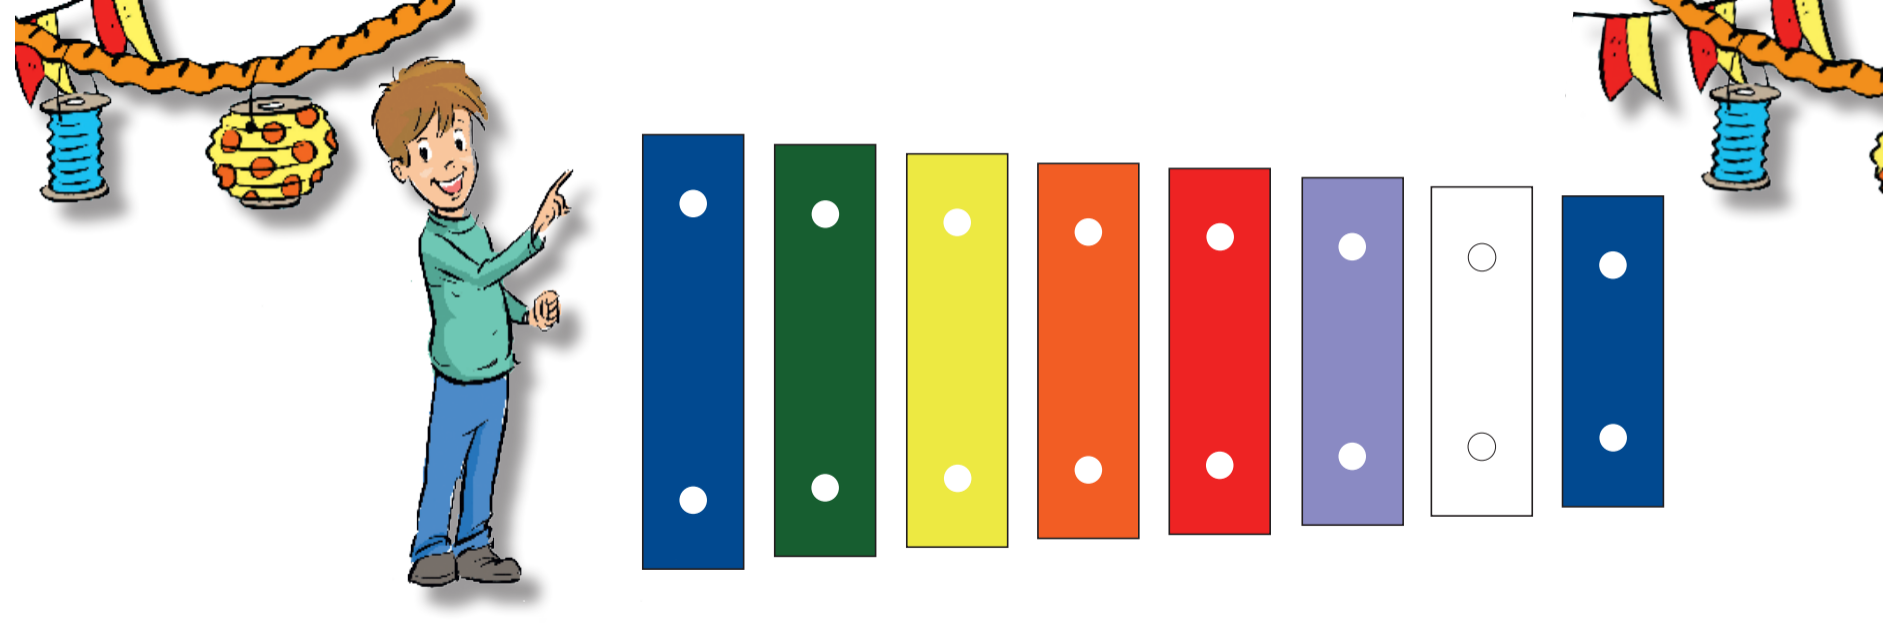

Français

Jouer le metallophone est
facile!
Les blocs colores representent
les barres sonores et leur
couleur montre lequel à jouer.
Quand tu rencontres un bloc
plus large, tu laisses resonner
le ton joue un peu avant de
jouer le prochain ton. Dans le
cas d'un bloc extra large le ton
dure aussi plus longtemps.
Amuse-toi!

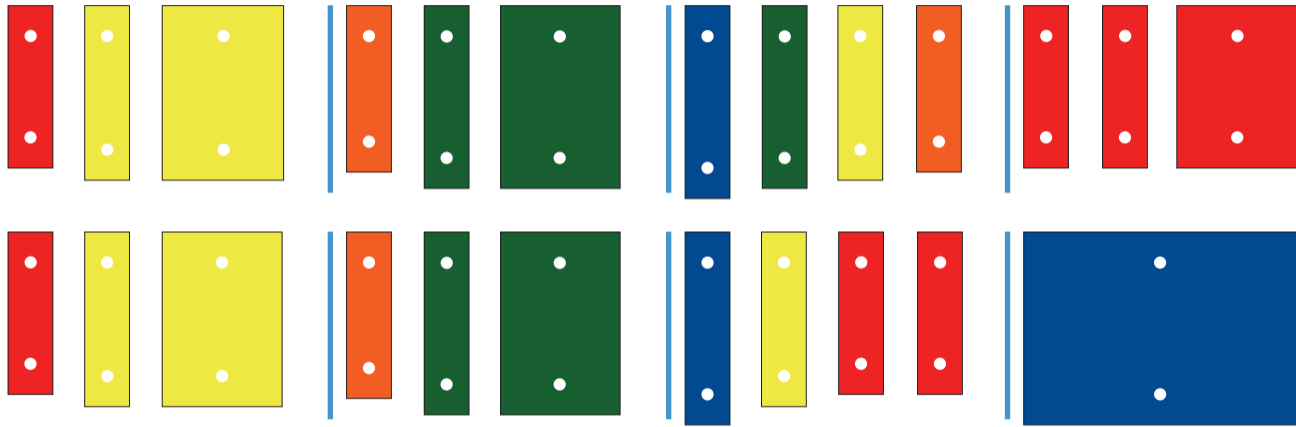

Deutsch

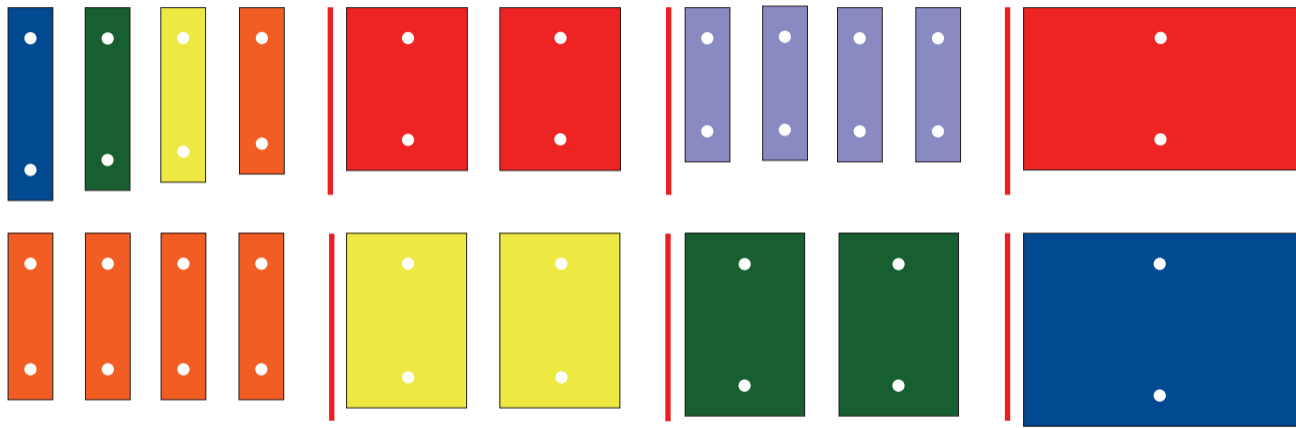

Metallophon spielen ist einfach!
Die farbigen Blockchen stellen
die Klangstaben vor und ihre
Farbe zeigt dir welche du
spielen musst. Wenn du einen
breiteren Block siehst, soll
den Ton ein bisschen longer
dauern. Bei einem extra breiten
Block klingt den gespielten Ton
natOrlich extra lang.
Viel SpaB!
